

AncientEurasia timing, endpoints, and two-epoch diagnostic

- Selected / tree truth
- Survival neutral
- Gamma-SMC focal
- Regional density (different statistic)
- Each observed 500-pool AF (filled)
- Median observed 100-panel AF (open)

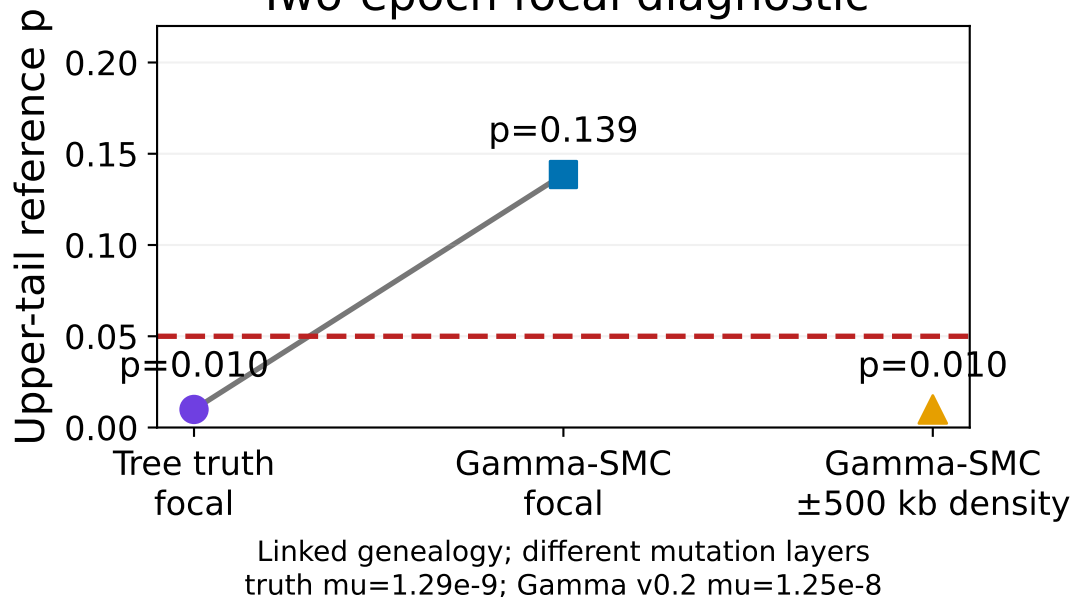

Timing schematic (not a trajectory)

Observed endpoint AF (no stored trajectories)

Two-epoch focal diagnostic

Why the designs differ

Feature	AncientEurasia	Two epoch
Selection	$s=0.01$	$s=0.05$
Origin	60 kya, archaic	4.5 kya, de novo
Selected pairs	100	2,000
Gamma stride	10 kb	1 kb
Mutation layer	$\mu=1.25e-8$	truth $1.29e-9$ Gamma $1.25e-8$
Primary null	survival only	unconditioned
